A'zamjon Shaydullayev

.Net Software Engineer

✉ ulugbekivich.uz@gmail.com   ☎ +998 94 273 26 50   🌐 GitHub   🌐 Telegram

Skilled .NET software engineer with one years of experience building and maintaining complex software systems. Adept at C#, ASP.NET CORE WEBAPI, and ASP.NET CORE MVC, with a deep understanding of software design patterns and best practices. Proven ability to lead cross-functional teams, communicate effectively with stakeholders, and deliver high-quality software on time. Seeking a growth-oriented role in a company that values innovation and collaboration.

Projects

LockWarden   *8/2022 - 10/2022*

Lockwarden is software application designed for everyone who want to save their password securely. The application suggests user-friendly interface so you can use it effortless

- I participated in the service and mainly design part of the project and connected the UI part to the backend part
- Used: C#, WPF, ADO.NET technology, SQL Lite and perfect password hashing algorithm

MindWord   *10/2022- 12/2023*

Mindword is an application that helps us to memorize english words. Everyone can learn words with different games based on world-known memorizing methods, and can observe their progress.

- I participated in the maintenance part of the project, recommended words, sorted words according to their level and solved problems of correct storage in the database.
- Used: C#, .Net Core, WPF, SQL Lite and ADO.NET technology

TwistFood-MVC   *12/2022- 02/2023*

TwistFood is a fast food ordering website. Our website is designed to be user-friendly, offering a seamless experience for customers looking to order food online.

- I worked on the service and web parts of the project, wrote a user-friendly and understandable user interface for ordering users, and managed the team as a leader in this project.
- Used: C#, Entitiy Freamwork, Asp.Ney Core 6, MVC, Javascript, Html, Css

EduUp   *02/2023 - ongoing*

This website is for educational purposes and its users can post their media tutorials to selling and share knowledge.

- As a project leader, I created the database structure and project architecture.
- I handle the CI/CD parts of the project and oversee the technical parts of the project and help my team debug them.
- Used: C#, Entitiy Freamwork, Asp.Ney Core 6, MVC, Javascript, Html, Css
